

Solution Story: Seal Heritage Center

Another quality solution by The iSoft Team

Date: September, 2010

Highlights

- Large auditorium with conference and theater capabilities
- Executive style conference room with custom AV furniture
- Large event hall with extensive video and audio capabilities
- Digital signage

A NEW FACILITY FOR THE SPECIAL WARFARE COMMUNITY

In September 2010, the iSoft Team completed the audio-visual design and integration solution for the new "Seal Heritage Center" at JEB Little Creek Naval Amphibious Base. The iSoft Team provided a large auditorium/theater with a 17'6" wide rear screen powered by dual 6000-lumen edge blended projectors.

Seal Heritage Center - New Auditorium/Theater

Each projector has a resolution higher than 1080p. The auditorium will be used to support the Special Warfare community by hosting conferences, seminars, training events and team building events. The ability to watch Blu-ray movies and HDTV programming was also provided. Control of all system components is provided through a Crestron in-wall wireless touch panel system. The room also hosts a 7.1 surround sound system driven by JBL commercial speakers and nearly 6000-watts of Crown power amplifiers.

Presenters have the ability to display up to four images simultaneously on the large screen with different background effects. A large American Flag background is shown in the photo above.

EQUIPPED MEETING SPACES

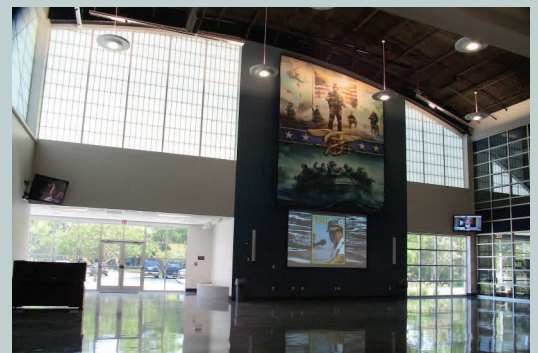

The iSoft Team also designed and installed a large executive conference room with custom AV furniture, a large event hall, an activity room, several digital signage displays, and office TVs throughout the facility. Multiple connections for computers and other peripherals were provided, and simple control was

Event Hall (Heritage Hall)

provided through Creston touch panel controllers. Digital signage was provided using Bright sign players and Panasonic LCD displays. In-wall iPod docking stations were provided for all event spaces.

"This facility honors those who have braved and even embraced the cold, wet and dark, and who have faced our enemies with almost unbelievable courage," said Admiral Eric Olson, Commander of the U.S. Special Operations Command.
